

MATERIAL HANDLING

Safe transport & Handling

Keep going. Keep safe.

EUREKA

SAFE MATERIAL TRANSPORT

Safe Material Handling:

Material handling of heavy items on a floating installation and in any process plant with narrow passages where cranes cannot reach is a challenging and risky operation.

The Eureka Sherpa™:

A special transport vehicle for safe transport of heavy objects. The Sherpa™ is agile and highly manoeuvrable as it turns around its own axis and climb most thresholds.

Sherpa™ Specifications:

- ATEX approved.
- Maximum capacity 12 tons.
- Pneumatic or electric drive.
- Remote controlled.
- Designed to operate in all weather conditions.

Sherpa™ Delivery options:

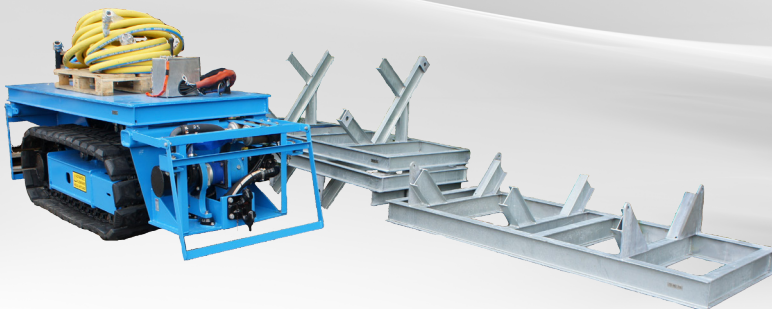

- It can be delivered with a flatbed for multiple use or with a variety of customised cradles for specific customer requirements.
- A trailer for cable drum or for transport of equipment can be delivered as an option.

Eureka Installation, transportation and storage cradles:

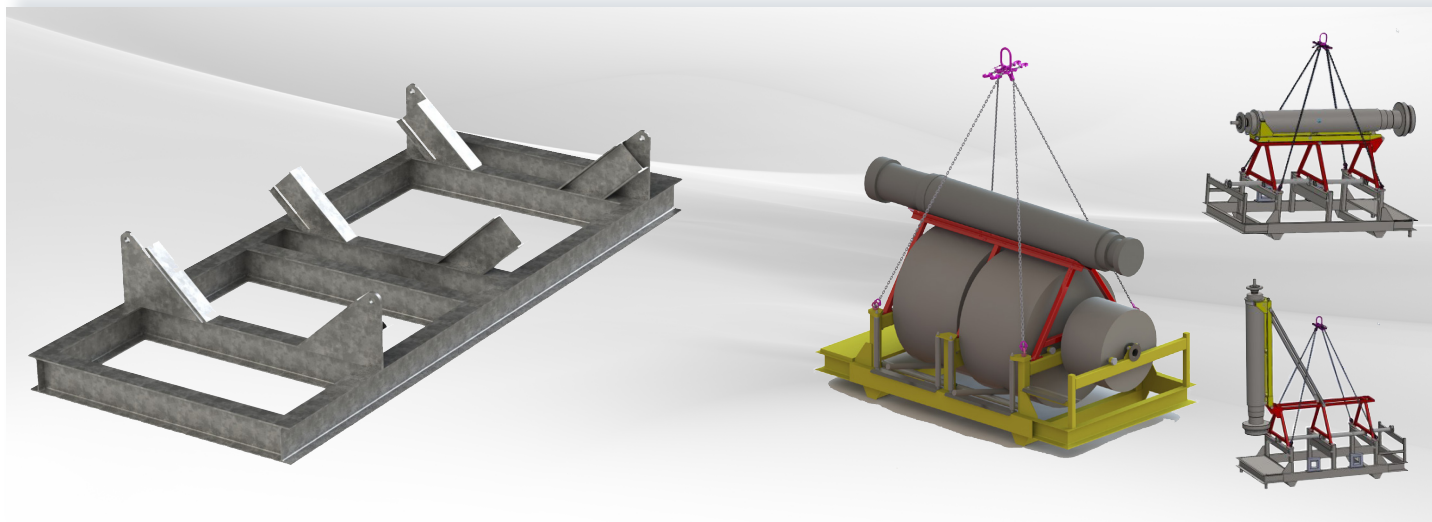

Eureka has extensive experience in designing, engineering and manufacturing cradles for safe and efficient handling of all types of pumps, motors and other equipment.

The flexible cradle design allow them to handle all necessary operations related to installation, transportation and storage of the equipment.

Use of the cradles increases safety and reduce the risk for injury and damage to personnel and equipment. An added advantage is a significant reduction of time consumption during these operations.

SAFE MATERIAL HANDLING

Features:

- One cradle for all operations, securing safe handling from storage to installed pump. No need of reloading.
- Easy turning solutions from horizontal position to vertical position.
- For use in specific areas with limited space available for safe handling of the equipment.
- Built-in cable handling solutions with loose or fixed cable drums.
- The cradles are designed, built, tested and documented according to customers specifications, NORSOK or similar.

Eureka Hang-Off Tool - Lifting equipment (Pat. Nr. 337045):

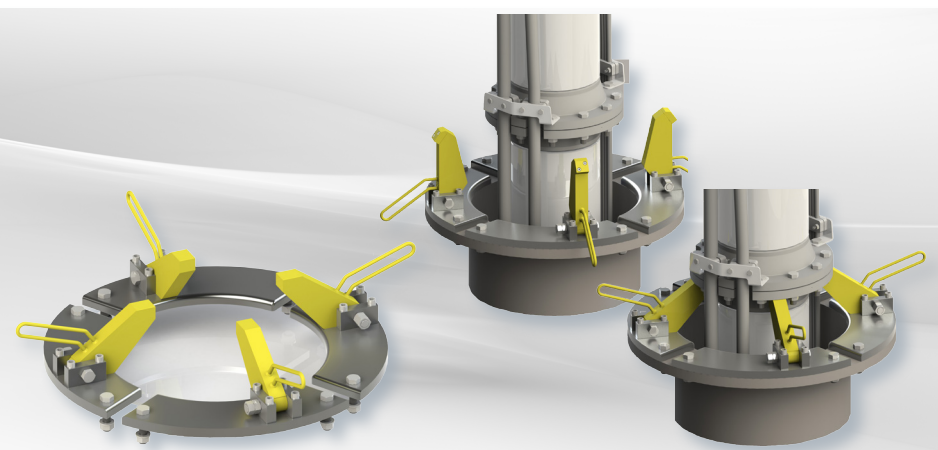

The Eureka hang off tool makes the job of installing and servicing vertical submerged pumps in caissons, safe and easy.

The tool is certified according to NORSOK standards.

Can be delivered in stainless steel making sure there will be no carbon contamination on motor, pump, non-return valve or riser pipes.

Features:

- No work on hanging load, reducing risk for both personnel and equipment.
- The tool makes the installation much more efficient and reduces the installation and service time significantly.
- A versatile tool that can be used for both riser pipes, non-return valve, pump and motor.

EUREKA PUMPS AS is a Norwegian pump supplier with more than 40 years of experience in the oil & gas and marine industry, offering a range of pumps and generator sets that covers a majority of applications. EUREKA PUMPS also offers services for upgrading, modification, equipment testing, installation and commissioning.

EUREKA PUMPS is a market leader among companies operating on the Norwegian Continental shelf, and it is also present in International markets with selected applications, based on own technology. EUREKA PUMPS main office is in Oslo (Lysaker), Norway, and has advanced service facilities along the Norwegian coast. EUREKA PUMPS also has branch offices in Houston, St. Johns, Busan and Kuala Lumpur.

EUREKA PUMPS is one of five companies in the ALIGN group, a leading supplier of production equipment and safety critical products and solutions. ALIGN offers services ensuring continuous production, a perspective that safeguards optimal operations and lower life-cycle costs. The ALIGN group is owned by Convento Capital and HitecVision.
